

Case Study

Lambeth College

Main Contractor Russell Cawberry contacted specialist contractor **Cemplas Waterproofing and Concrete Repairs Ltd** to provide their expertise to an external roof plant room wall of Lambeth college.

Formed in 1969 and with over forty year's industry experience, Cemplas Waterproofing and Concrete Repairs Ltd continue to provide expertise and reassurance in all areas of Concrete Repair offering the best value solutions to meet their client requirements combined with their ability to offer a total cost-effective solution.

A specification and method of operation was submitted to the main contractor, and the order was placed with Cemplas to proceed with the works.

Cemplas supplied all means of access both internally and externally and undertook the works using Fosroc Repair products.

Concrete Repair is not a standard process as the quantity of work required and the nature of that work may vary greatly, and as one of the top UK specialist contractors Cemplas have considerable flexibility in meeting the demands of large and small projects by managing our resource capacity across the whole company.

With our wealth of knowledge and expertise we can offer full technical advice and design specifications to meet our client's requirements, often proposing value engineering alternative products.

With years of experience our company has built a valued reputation, and we are recognized not only for our quality workmanship and reliable and efficient operatives but for being able to deliver a project on time and within the agreed budget.
