

Cemplas specialist flooring division

Our focus is on providing technical expertise, high quality installation and reliable performance and delivery in all types of floor screeding applications to include fast drying, free flowing, and traditional floor screeding for medium and large new and refurbishment projects covering the Retail, Leisure, Commercial, Residential, Health, and Education Market Sectors.

The overall business objective is providing value for money floor screeding solutions across our entire customer base by offering full technical advice and design specifications to meet our client's requirements, often proposing value engineering alternative products.

With years of experience Cemplas has built a valued reputation, and are recognised not only for quality workmanship and reliable and efficient operatives, but for being able to deliver a project on time and within the agreed budget.
