Top car deck

# Case Study // Car Parks

Client | **HUBER Car Park Systems**  
 Role | **Principal Contractor**  
 Consultant | **Kier Construction**

Intermediate Car Deck

**Specialist contractor Cemplas Waterproofing and Concrete Repairs Ltd were appointed to apply Tremco's car park coating system to the top deck, intermediate decks of a newly built multi-storey car park constructed by Kier construction for staff parking at Lonza's UK facility for Mammalian Biopharmaceuticals Corporation.**

The project was at Lonza's Slough site for their centre of excellence. The client HUBER Car Park Systems, designs, finances, constructs and operates multi-storey car park facilities.

Tremco MMA rapid cure deck waterproofing system was chosen due to its high quality finish and long deck surface life.

Cemplas were appointed due to their extent of specialist car deck waterproofing undertaken since they were formed in 1969.

At Cemplas we believe that our quality approach is not only reflected in the extensive history of car park refurbishment we have carried out over the years, but also in professionalism of our organisation by conducting our business using defined and approved processes enabling us to provide our client with the highest level of organisational quality at all times.

To substantiate this approach our organisation is accredited in accordance with the internationally approved ISO 9001 quality management standard and ISO 14001 environmental management systems.

Whilst refurbishment, renovation, and specialist Waterproofing remains a firm backbone for the company's operational prowess, Cemplas have over the years developed into a company carrying out works of all types across a far more varied sector base.
